ACADEMIC PROJECTS

- ❖ **Grow** [Link](#) **React Js | Tailwind Css | Supabase | Clerk**
 - Developed a **job portal** that connects job seekers with recruiters.
 - Implemented a **responsive, user-friendly interface using Tailwind CSS**.
 - Integrated Supabase for backend data management (1000+ users) and Clerk for secure authentication.
 - Allowed recruiters to post jobs and candidates to apply by submitting their resumes.
- ❖ **FitnessLab** [Link](#) **React Js | Material UI | APIs**
 - Created an **exercise web application** for users to search and view exercises based on body parts.
 - Used **Material UI** to ensure a **responsive**, consistent design across devices.
 - Integrated **APIs to fetch exercise data**, providing users with accurate information and tutorials
 - Enabled exercise **animations** and **video** tutorials to ensure users perform movements correctly.
 - Achieved **10 users** using FitnessLab.
- ❖ **Shortify** [Link](#) **React Js | Tailwind Css | Supabase**
 - Built a URL shortening web application that allows users to **shorten URLs** and generate **QR code**.
 - Used **Supabase for backend** storage of URL data and user information.
 - Implemented real-time analytics tracking **1000+ clicks** (location, device info).
